Associated Tele-Networking, Inc.

14100 W. 35th Place – Ste. 102 Aurora, CO 80011
Website: <http://www.atni.us>

Contact (s): Tony Puleston (Project Manager)
Telephone: 303-865-5716 Cell Phone: 720-339-7211
Email: tony.puleston@atni.us

Products/Services: ATNI is based in Denver, Colorado and provides Installation and De-Installation services to Tier 1 – Tier 4 Telecommunication Providers, Data Centers and Major Enterprise operations. Our largest clients are Qwest, Verizon, T-Mobile, XO Communications and Level 3. We install telecommunication equipment for Cisco, Fujitsu, Nortel and Metaswitch. Our Clients (large and small) benefit from the fact that we offset the costs of de-installation by liquidating the value of Legacy equipment and we offer a “Turnkey Solution” to their installation de-installation and Disposition needs.

We handle the resulting Legacy equipment in four ways:

- 1) Resale in the “Grey Marketplace”
- 2) De-manufacture to extract base metals, precious metals, plastics and resalable components.
- 3) Fully inventoried, storage and stock level maintenance
- 4) Discrete purchase of used equipment on behalf of our Clients.
- 5) Redistribution to other locations within client’s footprint.
- 6) Total destruction of “sensitive equipment” as required.

Our teams can operate anywhere within USA, Canada and include Technicians to Level IV (Power). We also handle Hazardous materials (Batteries, CRT Monitors etc) to EPA guidelines and resell used Gensets for our clients.

All work and processes are compliant with GR1275.

Products/Services: Digital Gardener LLC provides telecommunications some of the newest technologies designed to increase ARPU, lower churn rates and assist in providing the latest technologies. We provide the industry-leading Web 2.0 Unified Messaging Systems.

Our Unified Messaging system provides an affordable platform that allows the ability to offer additional SMA (Security, Monitoring and Automation) applications such as Home/Business Monitoring, Remote Video Storage, Remote Lockout Services and future applications such as Energy Management, Elder Care, Home Security, Media Management and other broadband applications.

Our affordable Unified Messaging System dramatically raises the bar on traditional email systems and most likely will save you money over your current email solution while increasing your retention rates. The Web 2.0 Messaging provides a platform to add numerous products and services that will increase ARPU and customer retention. Our products and services are offered as private labeled a la carte solutions or as complete turnkey solutions.

Our company consists of industry veterans from the telecommunications industry and pioneers from the “Connected Home” industry, to provide the newest products and services that are tested, reliable and that are at a price point that can reach the mass market. Currently we provide our services to hundreds of thousands of users. We have years of experience working for and assisting operators with rolling out new products and services.

During these economically challenging times, we provide solutions that save companies money, reduce IT work loads and, most importantly, provide a platform to increase ARPU today and into the future. Partnering with us prevents the need to invest large amounts of capital into infrastructure and human resources.

Products and Services:

- Unified Messaging / Email Hosting
- Spam, Virus and Phishing Filtering
- SMA (security, Monitoring and Automation) Hosted Applications
- Virtual ISP Vanity Services

Contact (s): Dan Gregg
Email: dan.g@transition.com

Joel Hildebrand

Products/Services: Transition Networks has a line of MEF 9 and MEF 14 certified 802.3ah (OAM) products that allow you to evolve your network. With features such as bandwidth allocation, loopback, VLAN and QoS, Transition's Network Interface Devices (NIDs) allow you to seamlessly deliver mission critical applications over Carrier Ethernet. Transition Networks' NIDs can be managed in a variety of methods, CLI, telnet, SNMP, web-based or without free SNMP GUI Focal Point, which includes a trap server and trap viewer application. With industry leading advanced features such as Auto-Negotiation, AutoCross, Link Pass Through, Far End Fault, Pause, and Automatic Link Restoration. Transition makes an invisible component in the physical layer "visible" to network managers, allowing more efficient troubleshooting and less on-site maintenance. These cost and time saving features, along with a lifetime hassle-free warranty and free 24x7 worldwide technical support make Transition Networks the perfect partner to evolve your network.

Products/Services: Zhone's Single Line Multi-Service architecture (SLMS) allows carriers to concurrently deliver voice, new premium data and video services over copper or fiber access lines. Optimized Broadband Access - scalable platforms and cabinets supporting 8 to 2880 ports per enclosure, local or line-powered, with optional watertight outside plant (OSP) enclosures to allow pole, pedestal or underground deployment. Optimized Migration to Packet - software selectable line and trunk interfaces; flexible uplinks including GR-303 / V5.2 / OC-12 / Gig.E. Optimized Triple Play - end-to-end solution alleviates incompatibilities and smoothes upgrades. Optimized transport - packet access plus resilient Packet Ring (RPR) transport to handle both TDM and packet traffic using shared virtual rings.
